Express

PERSONAL PROJECTS

Virtual Pharmacy

- I developed a virtual pharmacy app using PHP for backend server logic, database management, and user authentication.
- The frontend is responsive and user-friendly, built with HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS for easy browsing and ordering of pharmaceutical products.

Newspaper Application with react

- The Newspaper Application is a modern web application built with React that aggregates and displays news, sports, general, business, entertainment articles from various sources.
- Users can browse through the latest news, filter articles by category, and search for specific topics.

Bookstore with Mern

- The Bookstore Application is a full-stack web application developed using the MERN stack (**MongoDB, Express.js, React, Node.js**).
- This application allows users to browse, search, and select the favourite books that data will be stored in mongodb.
